SUBJECT: NOTIFICATION OF PATENT APPLICATION FILING

cc: MIKE BARROW
FM5-73

The following invention disclosures have been reviewed and a determination has been made to combine and file a U.S. Patent Application covering your inventions as follows:

Discl. Number: (6731)

PLASTIC BALL GRID ARRAY PACKAGE WITH REINFORCED CORNERS

Discl. Number: (6732)

PLASTIC BALL GRID ARRAY PACKAGE ENHANCED TO ELIMINATE SOLDERMASK CRACKS AND FLAKES

An attorney assigned to prepare the application will contact you for more details on your disclosures within one month. Please cooperate with the attorney in answering questions and providing support for your inventions. The attorney will use this information to prepare a draft of the patent application.

Once a draft of the application is prepared, you will be asked to review the draft to ensure that the most current version of the inventions is disclosed and suggest revisions prior to filing the application with the U.S. Patent and Trademark Office. It is essential that you make your review of the application a priority as patent rights can be lost for failure to timely file. Please do not take more than three weeks to review your application.

An Honorarium will be paid to you once the patent application is filed. In the meantime, if you have any questions, please call me.
